

Strategic Consulting and Development

We know the benefits of using open source software and we want to share our knowledge with you. We've been consulting with businesses, non-profits, and educational institutions since 2004 and can help you make informed decisions.

Our staff have been using and contributing to Python, Zope, Plone and related technologies for many years and we keep abreast of the latest projects like Django and Turbogears. Our engineers have a deep understanding of these products and can help you decide what's the best fit for your problem. If our turnkey solutions aren't right for you, we offer development services to customize an application to your particular needs.

Open source technologies powered the web revolution - start a revolution at your organization.

STRATEGIC CONSULTING	DEVELOPMENT SERVICES
<ul style="list-style-type: none">• Requirements assessments• Technology recommendations• Architectural analysis and design• Migration strategies• Design and branding	<ul style="list-style-type: none">• Custom themes and content types• Integration with relational databases• Performance tuning• Scaling & deployment with Amazon EC2• AJAX GUIs (Dojo, jQuery, KSS)
