

Hands-on Plone Training

Jazkarta offers a full range of Plone training for your organization or company. Whether you need basic training for your end users, advanced training for your developers, or training customized specifically for your IT team, we can get you up to speed.

Our instructors have been using and developing Plone and related technologies for years and have a deep understanding of how the system works, and how to get the most out of it. You can save your organization countless hours of time by tapping into our expertise.

Our User and Developer Training classes are offered regularly in the Boston area. If you have unusual training needs we can provide a customized, on-site class. This eliminates travel time and expenses and provides a private, team-building environment where proprietary issues can be discussed in confidence.

With Plone's diverse and feature-rich tool set and our years of web development experience, Jazkarta can help you take your website to a new level.

USER TRAINING	DEVELOPER TRAINING	CUSTOM TRAINING
Non-technical training geared towards individuals who will be managing your website or creating content. Length: 2 days	Technical training courses intended for those who will be designing, developing or administering a site. Length: 3 days	Choose a blend of training topics customized for your organization's specific needs. Length: 1 to 5 days
