

Plone in the Cloud

Plone is undisputed as one of the most powerful and extensible content management systems on the market, but finding hosting can be difficult. Setting up Plone on a server is best done by an expert to ensure that the site is optimized for performance, secured from hackers, and getting backed up safely. Ongoing attention is required to apply security patches and update to new versions of the code - both core Plone and add-on packages.

PondCMS is a unique solution to this problem. It provides a one-stop-shop CMS solution that includes everything - hosting, deployment, and upgrades. There's nothing to install, no hardware to buy and no upgrade costs to worry about - ever.

PondCMS is more than just another Plone hosting provider. PondCMS comes bundled with best-of-breed add-on components which are certified and tested to work reliably with Plone. We guarantee the whole stack, including maintenance and upgrades so you can focus on what's important - managing your content!
